The FAA Catalogs of Technical Reports are produced by the systems technology developed for the information retrieval system. This technology will be used in producing many of the other information retrieval services referenced in Order 1750.7, dated 7/25/67, which provided for the design, development, and management of an integrated system for the storage and retrieval of scientific, technical, and administrative reference information. The Office of Management Systems trusts that the products of this system will be useful to FAA libraries and to all agency personnel.

Director of Management Systems

P R E F A C E

The FAA Catalogs of Technical Reports for 1967 provide indexes of reports selected by and indexed for the Federal Aviation Administration during 1967. FAA Accession Numbers 67 19858 - 67 22000 are included. Five indexes--master or accession number, subject, report and contract number, author and corporate source, and series title--are prepared by computer programs developed in the Office of Management Systems (MS-110). Indexing was provided on contract by Jonker Corporation.

Availability of FAA Indexed Documents

- a. Loan copies of the reports listed in the FAA Catalogs are available to FAA personnel through the local FAA libraries, citing the FAA accession number. A list of the precise routing symbols and addresses for all libraries follows this preface.
- b. Reports bearing an AD, N, or PB number may be purchased from the Clearinghouse for Federal Scientific and Technical Information, 5285 Port Royal Road, Springfield, Virginia 22151, for \$3 for hard copy, 65¢ for microfiche. Reports not available from the Clearinghouse are available on microfilm in the FAA libraries.
